## ABOUT ME

I am a full-stack software developer specializing in front-end web and mobile development, particularly in React and React Native. I have experience working both in teams and independently, consistently meeting established objectives and deadlines while focusing on continually improving product quality.

My primary role in the projects I've worked on has been UI programming for websites and mobile applications. I use tools like React, React Native, CSS, TSX, MST, Firebase, AWS, and Figma, enabling me to create high-quality products that meet user needs.

I am committed to staying updated on the latest development technologies and practices to continuously enhance my skills and offer innovative and effective solutions. As a software developer, I am passionate about creating exceptional products and am excited to tackle new challenges in the future.

## EXPERIENCE

May 2022 - Present

### Mobile and Web Application Developer at Hybeans

[Web App](#) - [IOS App](#) - [Android App](#)

- **Front End:**
  - Responsible for programming the user interface (UI) using tools such as React, React Native, MST, and Figma, resulting in an intuitive and high-quality user experience.
- **Collaboration and Teamwork:**
  - Worked closely with the development team to ensure that the established objectives and project deadlines were met.
  - Collaborated with other departments within the company, such as design and testing teams, to ensure that the application met the established quality and usability standards.
- **Main Functions Developed:**
  - **Profile and Contact:** Implemented detailed profiles and direct contact functionalities with users.
  - **Organizer Panel:** Developed a tool panel for managing reservations, bookings, role administration, and all unified app modules.

- **Sales Management:** Implemented order control for tables, bars, and delivery with status notifications.
- **Ticket entry Validation:** Collaborated on a ticket management and QR scanning system.
- **Sales Details:** Implemented detailed sales reports of tickets and products, including quantities and types.
- **Reservations:** Collaborated on a reservation system for tables or sports fields depending on the location.
- **Wallet:** Updated the sales and reservation history system, and the linking of bank accounts.
- **Agenda:** Participated in the development of a tool for managing attended events, tickets, reservations, and invitations.
- **Notifications:** Worked on chat functionalities and follow-up requests for places or events.
- **Group Creation:** Implemented group profiles with feed and chat, allowing participation in team activities.
- **Personalized Feed:** Developed a feed with updates from places and events based on location.
- **Tours:** Created mapped routes between various places or events.
- **Live Event:** Led the implementation of real-time interactive events, facilitating interaction between organizers and users.
  - **Points of Interest and Maps:** Implemented detailed event information and locations within the venue.
  - **Product Sales:** Developed functionalities for selling tables, bars, tickets, and parking.
  - **Sports Module:** Implemented the management of tournaments, standings, and statistics.
  - **Points System:** Participated in a point allocation system for redeeming rewards.
  - **Experience Feed:** Added a feed for sharing event experiences.
  - **Order Management:** Implemented tracking of purchased orders and tickets.

January 2022 – May 2022

### **Custom Software Development: Stock Management Platform**

I designed and developed a custom stock management platform tailored to the needs of an American clothing store. Leveraging Java, Spring Boot, PostgreSQL, React, and Amazon AWS, the platform ensures efficient inventory management and seamless operations. This project underscored my proficiency in delivering robust solutions while working independently as a Freelance Web Developer.

## EDUCATION

### Higher Technicature in Computer Science

Universidad Nacional de General Sarmiento - Buenos Aires, Argentina

### Diploma in Java Programming

Universidad Tecnológica Nacional - Buenos Aires, Argentina

### Bachelor of Philosophy

Universidad de Buenos Aires - Buenos Aires, Argentina

## SKILLS

- **Advanced knowledge of React and React Native:** Ability to build reusable and performance-optimized components.
- **Mastery of fundamental HTML, CSS, and JavaScript concepts:** Capability to write clean and semantic code.
- **Experience in real-time application development:** Proficient with Firebase Realtime Database and managing real-time changes in applications.
- **Comprehensive use of Firebase:** Including Firestore for database management, user authentication, and push notification integration
- **Knowledge of Git:** Proficient in working with remote repositories and managing version conflicts.
- **Understanding of React or React Native application architecture:** Ability to design and maintain an organized and scalable folder structure.
- **User experience optimization:** Develop and maintain an optimized and accessible user experience using accessibility techniques and responsive design.
- **Team collaboration skills:** Using project management tools and communication platforms like Jira and Slack.
- **Quick learning and adaptation:** Capable of quickly learning and adapting to new technologies and tools in mobile and web application development.
- **Effective problem analysis and resolution:** Skilled in analyzing and resolving issues in software development.
- **Effective communication and collaboration:** Strong skills in building positive connections and fostering a collaborative work environment with team members, clients, and stakeholders.
