SUMMARY

Software Engineer focused on mobile and web development, with a strong AI-first mindset. I design and ship scalable mobile and web applications using React, React Native, and TypeScript, and I leverage Claude Code to build agents, skills, and orchestration workflows that automate and standardize engineering processes across the team. I have integrated complex APIs, designed product-centered user experiences, and delivered key functionalities on high-impact platforms like Mendel, Pago Facil, and Western Union, reaching millions of users and finance teams across LATAM.

PROFESSIONAL EXPERIENCE

Mendel | Mobile & AI Developer - Expense & Travel Tech

Buenos Aires, Argentina

December 2025 - Present

- Develop and maintain new features for iOS and Android applications using React Native, ensuring scalability and performance in a high-traffic B2B FinTech environment.
- Contribute to a multi-brand and white-label mobile architecture, enabling multiple client apps and brand customizations from a shared codebase without forks.
- Lead AI-first development enablement with Claude Code, co-building and maintaining agents, skills, slash commands, and orchestrator workflows that automate scaffolding, code review, testing, and release processes across the mobile team.
- Collaborate closely with Product, Design, and Backend teams to define and implement scalable, user-focused solutions.
- Optimize application performance, security, and user experience across different brands and environments.
- Actively participate in code reviews, automated testing, and continuous delivery processes.
- Main technologies: TypeScript, React Native, Claude Code, REST APIs, CI/CD, Clean Architecture.

Bizland Tech | Mobile Developer - FinTech

Buenos Aires, Argentina

August 2024 - December 2025

- Participated in the development of the PSP (Payment Service Provider) solution, integrating multiple digital wallets and collaborating with external technical teams.
- Implemented new functionalities and key improvements in the Pago Facil app, with over 1.5M downloads and 500K monthly active users on iOS and Android.
- Optimized performance and code quality on mobile platforms, reducing errors and improving overall stability.
- Designed intuitive and consistent interfaces using Figma, aligned with product objectives and focused on user experience.

- Resolved critical production incidents with agile response times, ensuring operational stability in real environments.
- Main technologies: TypeScript, React, React Native, Redux, Firebase, AWS, Figma, REST APIs, Cursor AI, Clean Architecture MVCP.

Hybeans S.A. | Web and Mobile Developer - Event Tech

Buenos Aires, Argentina

May 2022 - August 2024

- Developed end-to-end functionalities for an event management and real-time social interaction platform, available as a web app and mobile applications for iOS and Android.
- Participated in complete UI/UX flows using Figma and backend integration with Firebase.
- Implemented a sales and order tracking system for buyers and sellers, optimizing user experience at events.
- Built an event calendar with real-time reservations and confirmations, plus a digital ticketing system with on-site validation and app-based verification.
- Integrated social modules such as dynamic feeds, live chat, and push notifications to encourage user participation.
- Developed custom interactive maps to improve navigation and the in-person event experience.
- Worked in close collaboration with design, QA, and backend teams, meeting demanding deadlines under agile methodologies.
- Participated actively in deployments during live events, monitoring performance, ensuring stability, and resolving critical incidents in real time.
- Main technologies: TypeScript, React, React Native, MobX State Tree, Firebase, Figma, REST APIs, Clean Architecture MVVM.

Freelance | Full Stack Developer

Buenos Aires, Argentina

November 2020 - May 2022

- Designed and developed a custom inventory management system using a Spring Boot backend, PostgreSQL, and cloud deployment through AWS.
- Created responsive websites for small organizations, implementing modern UI components and lightweight content management tools.
- Gathered and analyzed functional requirements directly with clients, ensuring scalable solutions adapted to their specific needs.
- Main technologies: TypeScript, React, Java, Redux, Firebase, AWS, REST APIs, Spring Boot, PostgreSQL.

EDUCATION

Universidad Nacional de General Sarmiento

Buenos Aires, Argentina

Higher Technical Degree in Computer Science

2019 - 2022

Universidad de Buenos Aires

Buenos Aires, Argentina

Bachelor's Degree in Philosophy

2015 - 2019

ADDITIONAL SKILLS

- Languages & Frameworks: React, React Native, TypeScript, JavaScript, Java, Spring Boot, Node.js, HTML, CSS
- Backend & Databases: Firebase (Firestore, Realtime DB, Auth), PostgreSQL, MongoDB, REST APIs, AWS Serverless, SQL and NoSQL
- AI Engineering: Claude Code, agent design, skills authoring, slash commands, orchestrator agents, Cursor AI, prompt engineering, AI-assisted code review and testing
- Tools & Platforms: Figma, Git, Jira, Xcode, Android Studio, App Store Connect, Google Play Console
- Technical & Personal Competencies: Technical leadership, teamwork, effective communication, problem-solving, focus on user experience
- Languages: Spanish (native), English (B2)
